1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5,11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. These claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not known the structure and the software/hardware interface which comprises the computer controlled display.

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,2,6-9,12,13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bruneau. Bruneau discloses the claimed folding panel assembly including a plurality of folding panels 6 hingedly mounted to vertically-oriented frames, first and second locking bars 30,31. It is noted that the claims have been amended to recite that

the folding panel assembly has an absence of any elements that would unite the folding panels to horizontal members that would span above and/or below the opening.

However, it is a well settled issue that to eliminate an element together with its function would have been obvious to one of ordinary skill in the art.

- 3. Claims 4,10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bruneau in view of Dykes. While Bruneau does not set forth a decorative or descriptive panel, Dykes discloses a folding panel assembly comprising decorative or descriptive panels 30a-d, wherein, to incorporate this teaching into the folding panel assembly of Bruneau for the purpose of aesthetics would have been obvious to one of ordinary skill in the art.
- 4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bruneau in view of Thun et al. While Bruneau does not set forth the use of a spring, Thun et al disclose a folding panel assembly 20,21 comprising spring 58 biased hinges 29, wherein, to incorporate this teaching into the folding panel assembly of Bruneau for the purpose of facilitating the movement of the panels would have been obvious to one of ordinary skill in the art.
